

MSCC Techniques Speed Championship

Lydden Hill Circuit

April 10th 2010

Dry and sunny

Lydden Hill is a nice little circuit and was on the Speedmog calendar for the first time but entries were low and when Greg Parnell's Aero developed an electrical failure on the way to the event the Morgan presence was reduced to the singular. May be the journey to the south eastern corner of the country was a trip too far.

Nevertheless the Speedmog representative made the most of the fine Spring weather to have a good blast round the circuit and the support from local Morgan man Gerry Seale was appreciated.

It was a morning only event and after a long practice and three timed runs we were packed up and on our way by 12.30 which was a bonus.

The event would certainly be recommended if interest is there for the future.
