

## **MSCC TECHNIQUES SPEED CHAMPIONSHIP**

Event: Three Sisters  
Date: 3rd August 2014  
Weather: Overcast am / brighter pm

Well that was fun, and look what you all missed!

As always with Chester and Lancashire Motor Club's joint event, the organisation was exemplary and the timed runs on the two lapped course just came on coming.

With a damp track to start with everyone took time finding the grip levels, but as practice continued the track dried out allowing for a lot of 'spirited' driving.

I was up against a Porsche Boxster but as it was the guy's first outing, having changed over from a Caterham (why!!!!), by his own admission he was only finding his feet.

With my new R380 gearbox it was fun finding where the change points were, but my times soon started to tumble, and I ended up with my fastest time ever at this event!!!

In many ways doing that made it more palatable to give myself 100 points, but I still felt it was something of a pyrrhic victory.

Chester and Lancashire have stated publicly that they will continue to run this event as a two-lapper, and I would encourage everyone to attend - the track is twisty and challenging and I can't think of a friendlier and more approachable group of organiser. They deserve our continued support!!!

All you championship fliers missed a great day out and, with me as the only opposition, the chance for an easy 100 points!!!

Clive Glass
