

MSCC Techniques Speed Championship

Event Report: Debden

Date: 6th May 2018

Weather: Sunny and Hot

The short drive to the Debden Sprint course in North Essex was always a better option than the long trip to Anglesey which was the alternative Speedmog venue for the Bank Holiday weekend but it was a pity that the Morgan representation at this event was in the singular. Nevertheless it was good to enjoy the hot weather and encouraging to see a number of Morgans in the spectators car park.

The Debden course is traditionally a rather fluid layout and this year was no exception as two of the bends had been made a little tighter than last year and as a result the class 9 target set then by Paul Clarke was even further out of reach.

But this did not detract from the enjoyment of the day. Car and driver got round safely and look forward to meeting with other Speedmogs at the next event, Harewood hillclimb.
