

MSCC Techniques Speed Championship 2023

Venue: Three Sisters
Date: 11th June 2023

To finish first.....

We hadn't been to 3 Sisters for quite some time, we thought about 12 years, so we were looking forward to returning. We travelled to Wigan on Saturday, although proceedings didn't start until 10am on Sunday, so we had plenty of time to sort the car and ourselves.

Jonno Baines came over to say hello; he was competing in his Clio. We were the only Morgan as Colin had withdrawn.

It was hot – very hot and there was little shade in the paddock. Fortunately a van was parked next to us so we used it's shadow to escape the heat. We took advantage of the convoy run as it was such a long time since we had been there.

There was only one practice run as it was a double lapper. I went out first, and Chris was the penultimate car out. He came back with the car very hot and water pouring out of the bottom of the radiator.

We purchased some Radweld from one of the Caterham chaps, but it didn't work unfortunately. Our day was finished without a timed run. We loaded the car up and left the circuit; a very short drive onto the industrial estate outside, and waited for the rescue truck to take us home. At least there was some shade and we indulged in an ice cream.

It proves that even if you are the only Morgan you might not get 100%, and to finish first.....first you need to finish!
